| github.com/abubakkar-dev-code

PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 1+ year of experience at Yoho Technologies and current training in Full-Stack Development with Generative AI. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, RESTful APIs, and microservices. Experienced in developing scalable web applications, backend services, and real-time communication features. Previously worked in Automated Optical Inspection (AOI) programming and PCB quality assurance at Foxconn Technologies, enhancing skills in troubleshooting and quality control. Currently focused on advancing full-stack and Generative AI capabilities to return to an IT development role.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Java, SQL

Frontend Development: React.js, Redux, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, ShadCN UI

Backend Development: Node.js, Express.js, NestJS, RESTful APIs, Microservices

Databases: MongoDB, Mongoose, PostgreSQL, MySQL, SQL

Generative AI & Integration: Generative AI APIs, LLM Workflows, Third-Party API Integration

Security & Authentication: JWT, OAuth, Bcrypt, Role-Based Access Control

Cloud & Storage: AWS S3, Firebase Storage

Real-Time & Messaging: Socket.IO, KafkaJS, Event-Driven Architecture

Development Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

FULL-STACK & GENERATIVE AI — UPSKILLING

2026 - Present

- Building full-stack applications using a modern development stack spanning frontend, backend, databases, APIs, and Generative AI integrations.
- Developed applications using 2 primary frontend technologies/frameworks — React.js and TypeScript — with Redux, Tailwind CSS, and modern UI libraries.
- Engineered backend solutions using 3 technologies — Node.js, Express.js, and NestJS — for API and microservice development.
- Integrated Generative AI APIs and LLM workflows into full-stack application development as part of ongoing advanced IT upskilling.

FOXCONN TECHNOLOGIES | Sriperumbudur, India

2025 - 2026

AOI PROGRAMMER

- Completed 1 year of professional experience in Automated Optical Inspection (AOI) programming within PCB manufacturing and quality-assurance operations.
- Programmed and configured AOI machines to perform high-precision automated inspection of printed circuit boards (PCBs).
- Configured inspection parameters according to PCB inspection requirements to support accurate automated defect detection.
- Analyzed inspection results and adjusted inspection parameters to address false defect identification and improve inspection consistency.
- Supported PCB quality-control activities by identifying inspection-related issues and maintaining reliable automated inspection workflows.

YOH0 TECHNOLOGIES | Chennai, India

2024 - 2025

MERN STACK DEVELOPER TRAINEE

- Completed 1 year of hands-on experience in MERN stack development, contributing across frontend, backend, database, API, authentication, and testing activities.
- Designed and developed RESTful APIs and microservices using Node.js and Express.js to support scalable web application functionality.
- Implemented secure authentication and authorization using 3 security technologies: JWT, OAuth, and Bcrypt.
- Integrated third-party cloud services and APIs to extend application functionality and connect external services with backend workflows.
- Optimized MongoDB performance through query optimization, schema design, and database indexing.

PROJECTS

LEARNING MANAGEMENT SYSTEM (LMS)

Role-Based Training & Certification Platform

- Designed and developed a microservices-based Learning Management System organized around 3 primary functional domains: courses, assessments, and user roles.
- Implemented 3 core learner workflows covering progress tracking, assessment evaluation, and automated certification generation.
- Integrated an API Gateway with KafkaJS to support asynchronous, event-driven communication between independent services.
- Applied a full-stack architecture combining React.js, Node.js, Express.js, MongoDB, microservices, API Gateway, KafkaJS, and modern UI technologies.

REAL-TIME CHAT APPLICATION

Real-Time Messaging Platform

- Developed an end-to-end real-time communication platform supporting instant user messaging.
- Implemented Socket.IO for low-latency, event-driven communication between connected users.
- Built JWT-based authentication and authorization to secure user access and messaging functionality.
- Developed backend APIs using Node.js and Express.js and implemented MongoDB data models for persistent message storage.
- Integrated 4 major application layers: React frontend, Node.js backend, MongoDB database, and Socket.IO real-time communication.

SERVICE MANAGEMENT SYSTEM (SMS)

Automotive Service Center Management Platform

- Developed a full-stack automotive service-management platform covering 5 operational modules: job cards, mechanics, inventory, notifications, and payments.
- Implemented real-time service-status updates to improve visibility across the service workflow.
- Integrated automated SMS and alert functionality for service-completion communication.
- Integrated Razorpay payment processing to support digital transactions within the application.

EDUCATION

BACHELOR OF ENGINEERING (B.E.)

2020 - 2024

University College of Engineering, Kanchipuram, India

CERTIFICATIONS

- Full-Stack Development with Generative AI – Advanced Certification, 2026
- Core Java with MySQL Certification — NIIT, Tiruvallur

SOFT SKILLS

- | | |
|--------------------------------------|--------------------------------------|
| • Full-Stack Application Development | • Database Optimization |
| • Problem Solving & Debugging | • Secure Application Development |
| • Analytical Thinking | • Adaptability & Continuous Learning |
| • API Development & Integration | • Attention to Detail |
